

KYC / Onboarding App

Low-fidelity Wireframes - Customer journey + Ops console

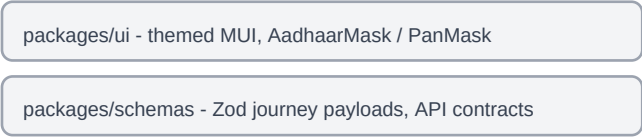

Derived from apps/web/src/features/* - packages/ui (Novac design system) - packages/schemas (Zod)

OPS CONSOLE (desktop)

SHARED PACKAGES

CONTENTS

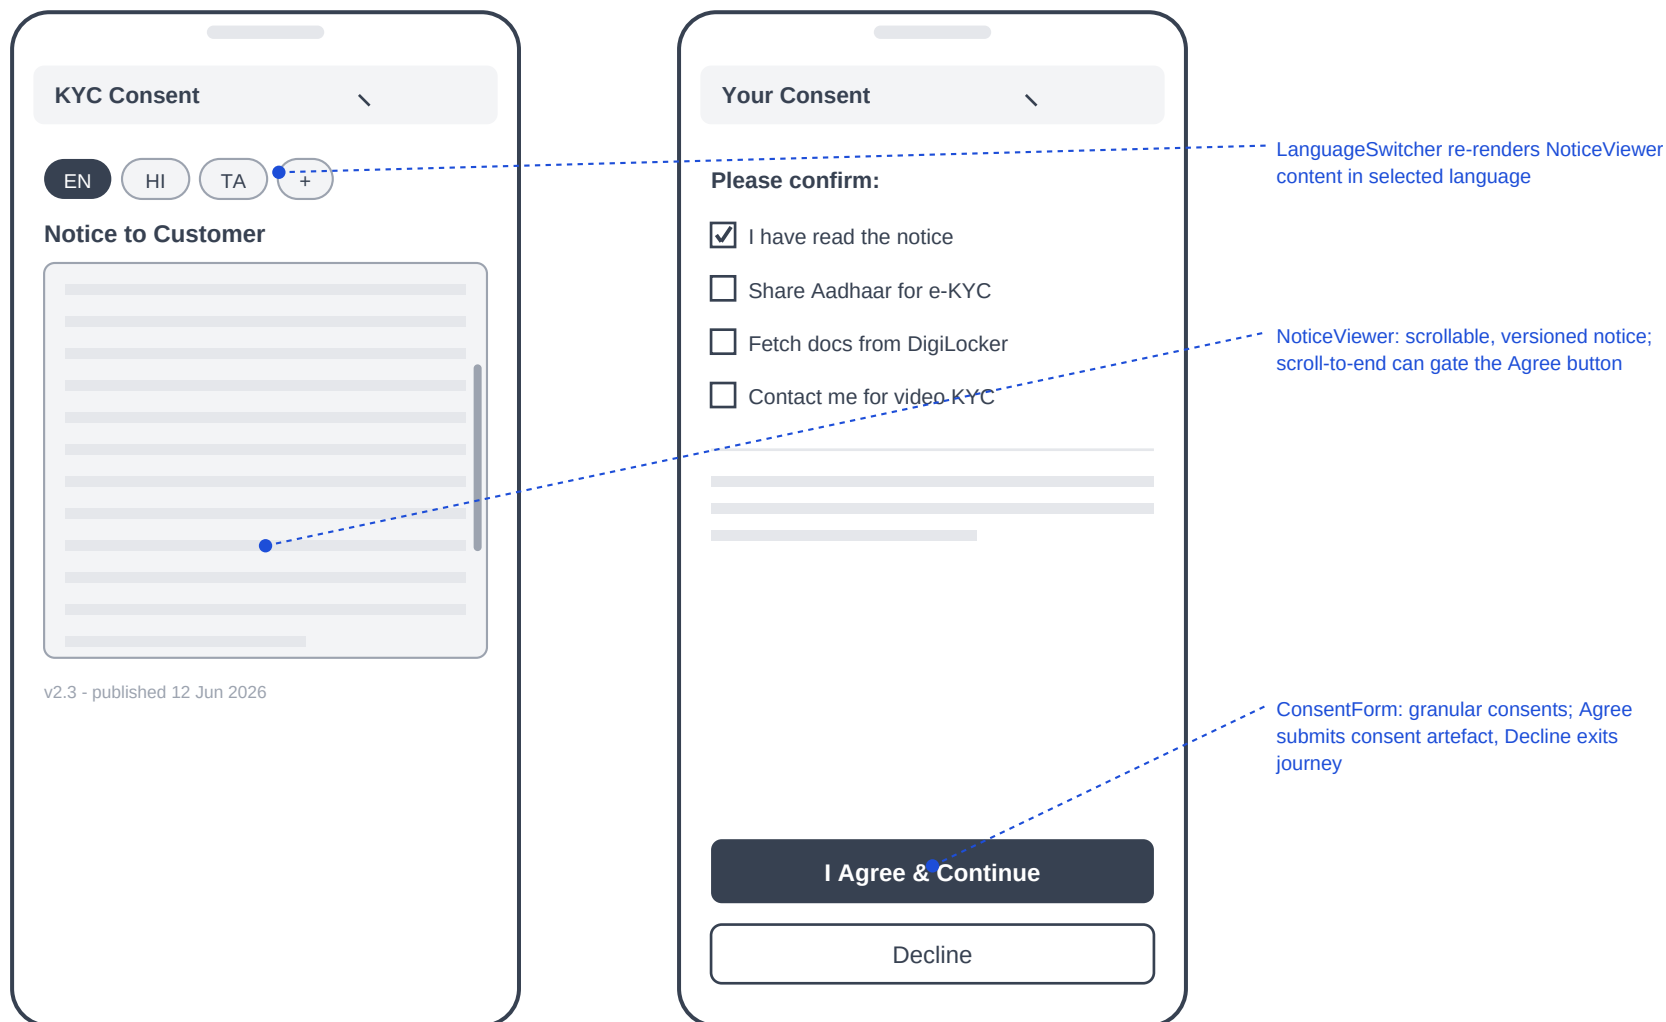

- | | |
|-------------------------|-------------------------|
| 02 Consent | 07 Selfie & Liveness |
| 03 Journey & Mode | 08 VCIP (Video KYC) |
| 04 Aadhaar Verification | 09 Ops - Review Queue |
| 05 DigiLocker | 10 Ops - Case Workbench |
| 06 Document Capture | 11 Ops - MIS Dashboards |

COMPONENTS

NoticeViewer

ConsentForm

LanguageSwitcher

Note: On submit, a consent artefact (notice version + language + timestamp) is built from packages/schemas and POSTed before the journey starts.

COMPONENTS

JourneyRouter

Saved 2 hours ago - expires in 5 days

Resume

Start over

ProgressTracker: bound to state-machine; steps are skipped/reordered per selected mode

ModeSelector cards; availability driven by config + eligibility (JourneyRouter guards)

ResumeSession: restores persisted journey payload (Zod-validated) and routes to last incomplete state

Note: JourneyRouter is state-machine driven: each step emits events; ProgressTracker reflects machine state; ResumeSession rehydrates a saved journey.

- COMPONENTS
- AadhaarOtpForm
- OtpEntry
- OfflineXmlUpload

Aadhaar e-KYC

C

M

A

D

S

V

Enter Aadhaar number

Aadhaar Number

XXXX - XXXX - 82 _ _

☒ I consent to UIDAI OTP auth

Send OTP

-- Or --

Upload Offline XML instead

AadhaarOtpForm - masked input (AadhaarMask primitive)

Enter OTP

OTP sent to +91 9XXXX X4321

*

*

*

Resend in 00:27

Verify

OtpEntry - 6 boxes, auto-advance, resend timer

Offline Aadhaar XML

Drop UIDAI .zip here or tap to browse

offline-ekyc-2026.zip 1.2 MB

Share code (4 chars)

* * * _

Verify & Continue

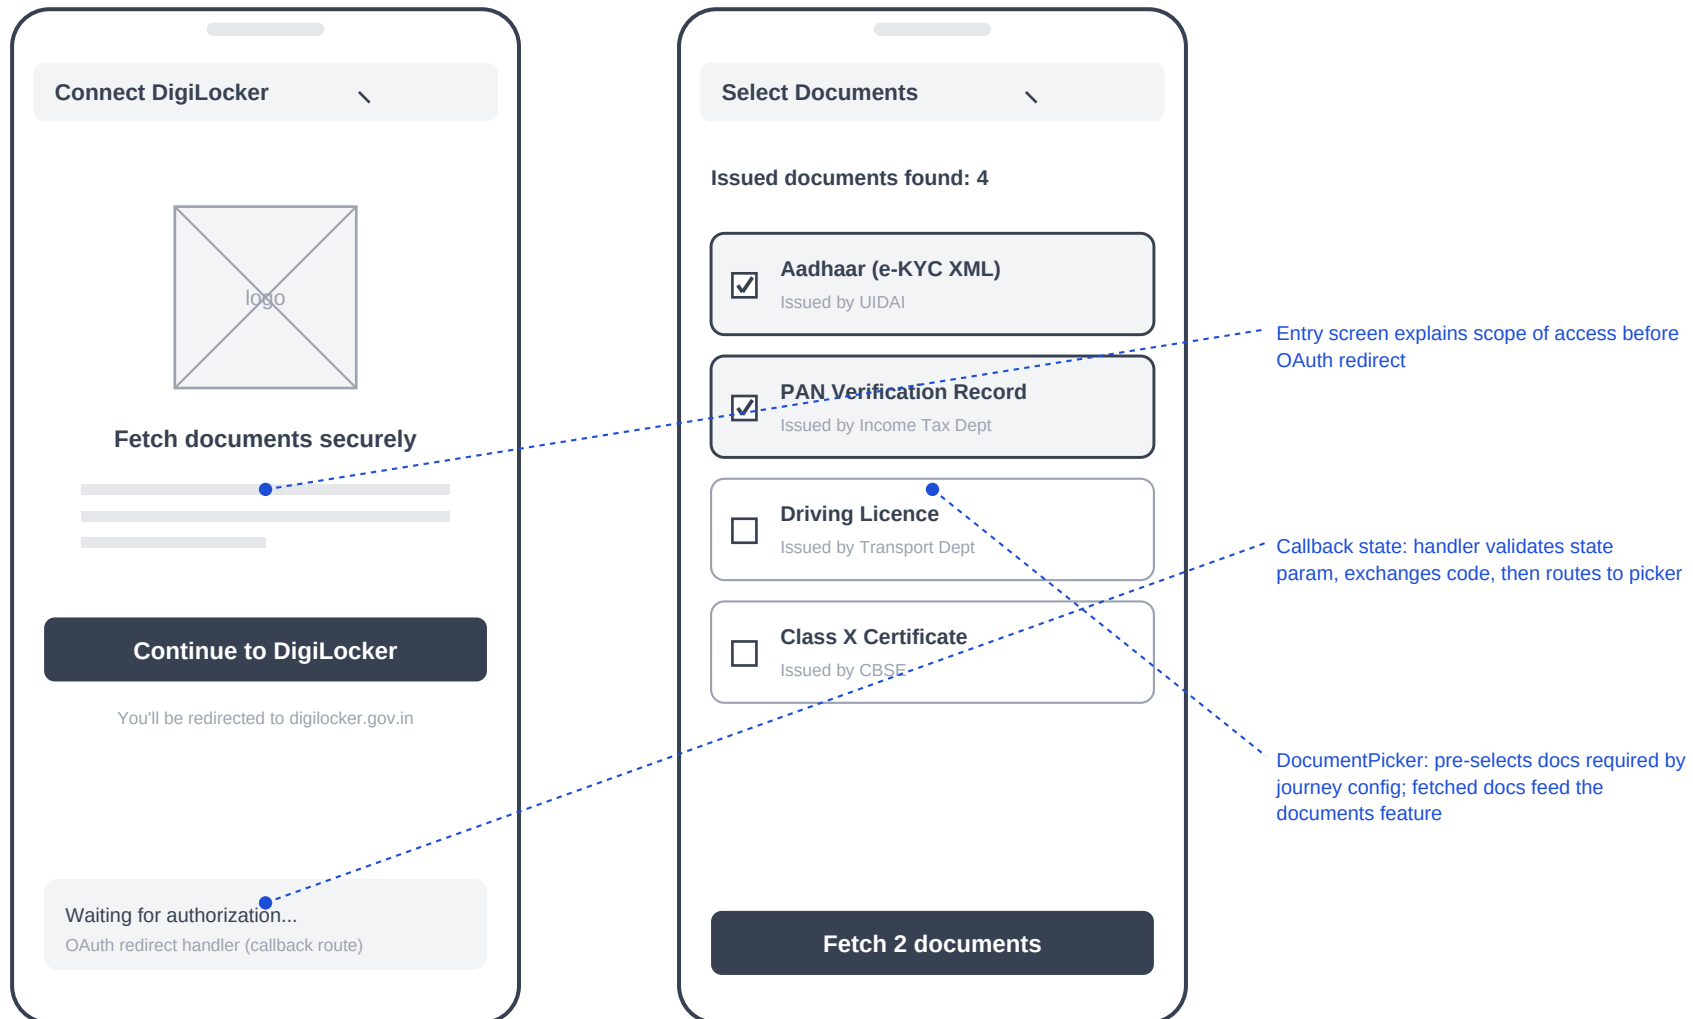

OfflineXmlUpload - zip + share code, client-side Zod validation

Note: AadhaarMask from packages/ui keeps first 8 digits masked (XXXX-XXXX-1234). Offline XML path accepts UIDAI zip + 4-char share code.

COMPONENTS

OAuth redirect handler

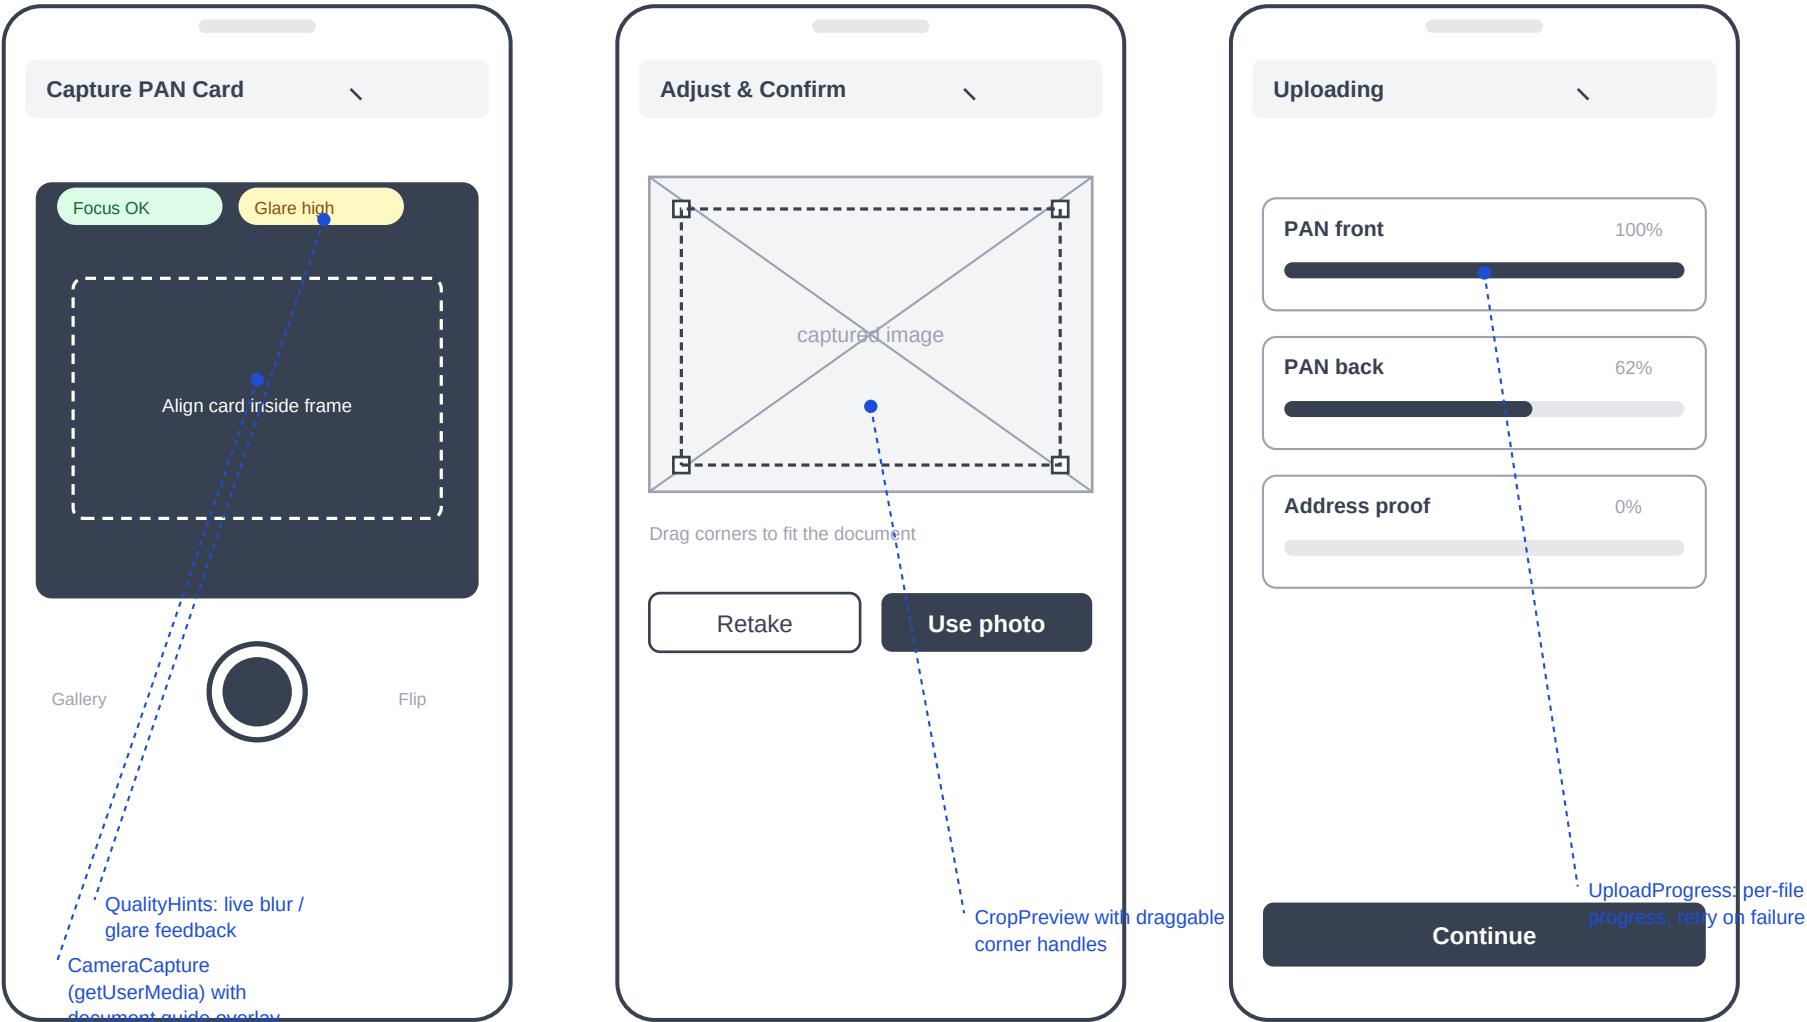

DocumentPicker

Note: User is redirected to DigiLocker OAuth; on callback, the handler exchanges the code and the picker lists issued documents to pull.

COMPONENTS

- CameraCapture
- QualityHints
- CropPreview
- UploadProgress

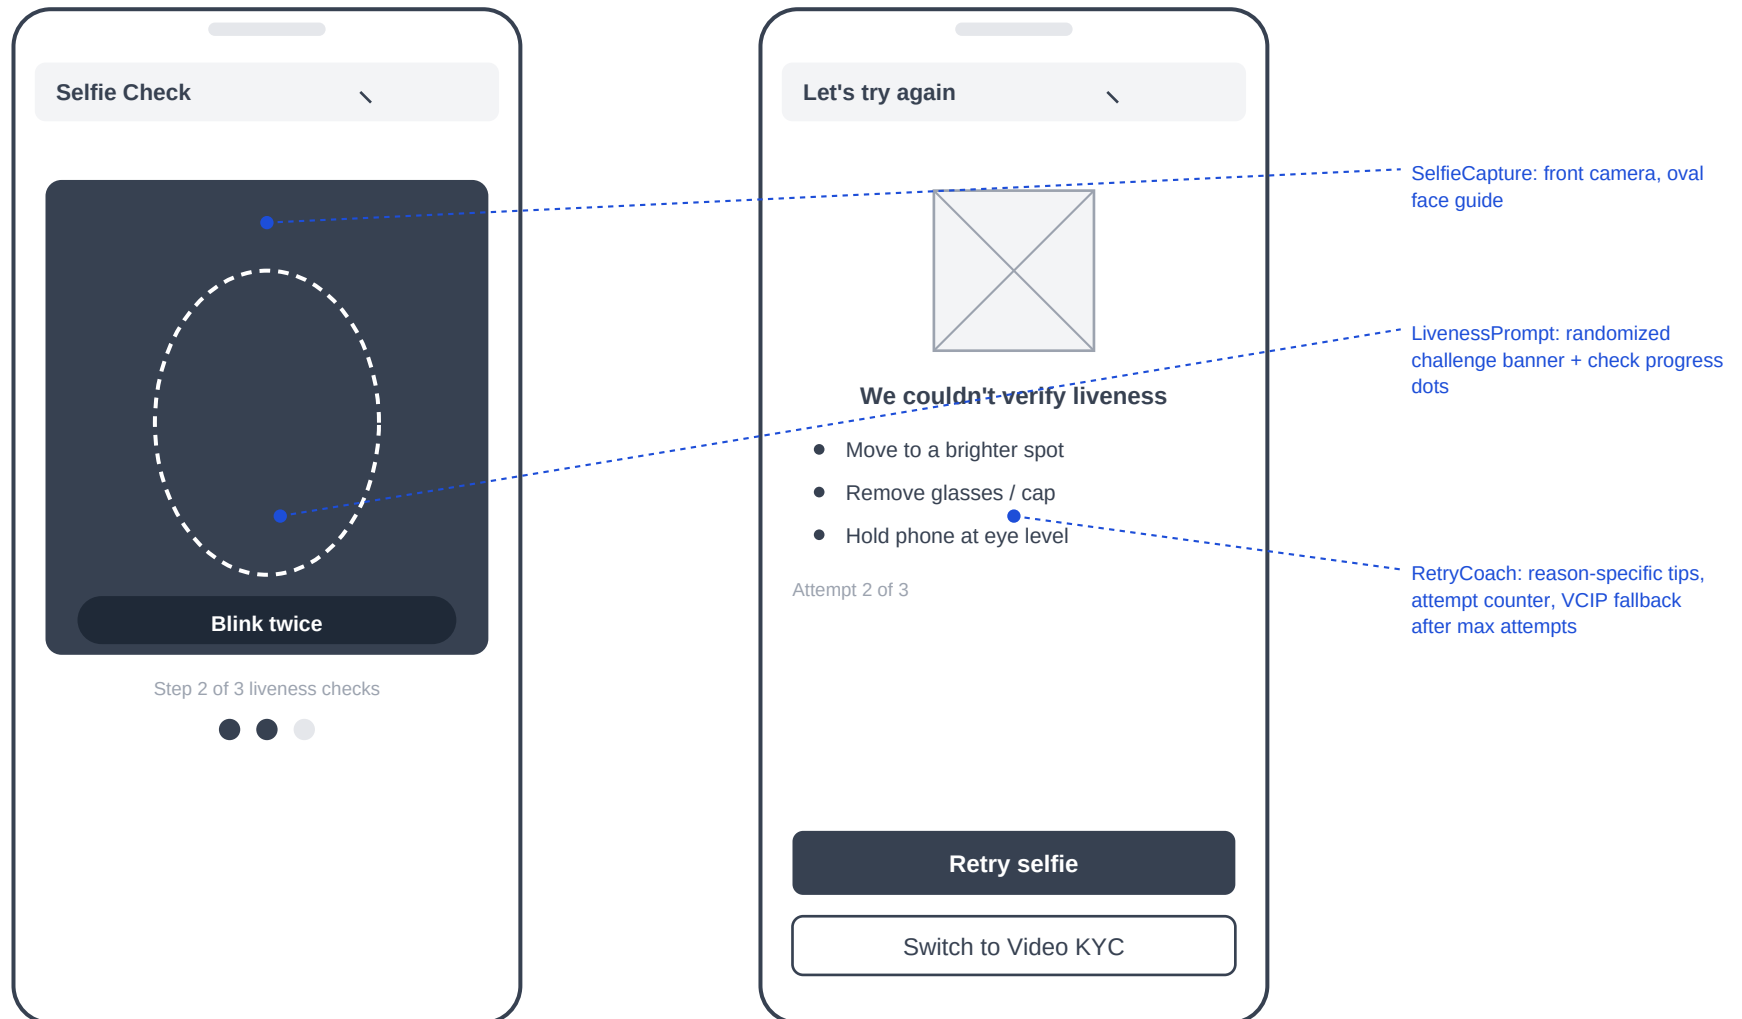

Note: CameraCapture uses getUserMedia; QualityHints runs live blur/glare checks; CropPreview lets the user adjust edges before upload.

COMPONENTS

LivenessPrompt

SelfieCapture

RetryCoach

Note: LivenessPrompt issues randomized challenges (blink / turn head); RetryCoach explains failures and coaches the user before re-attempt.

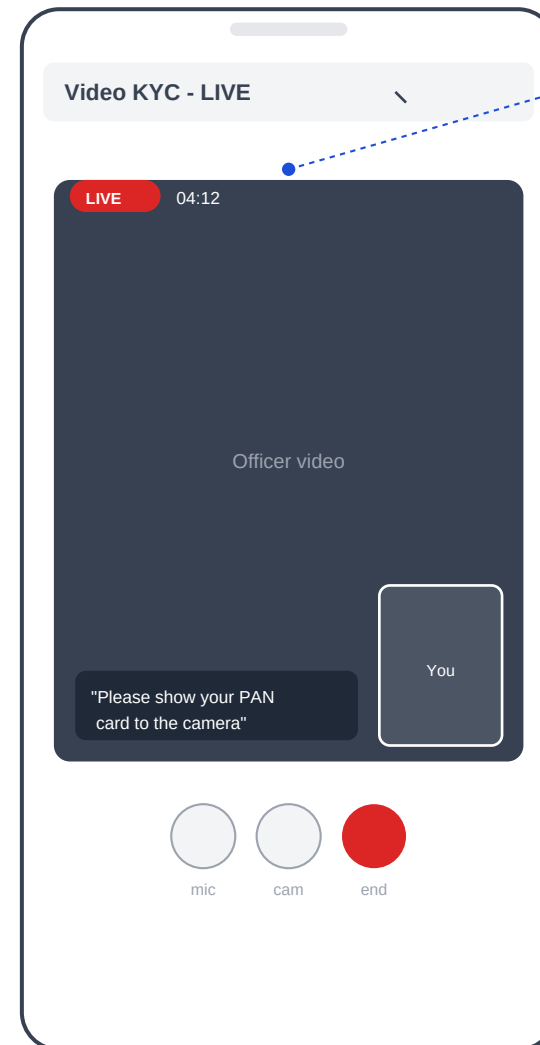

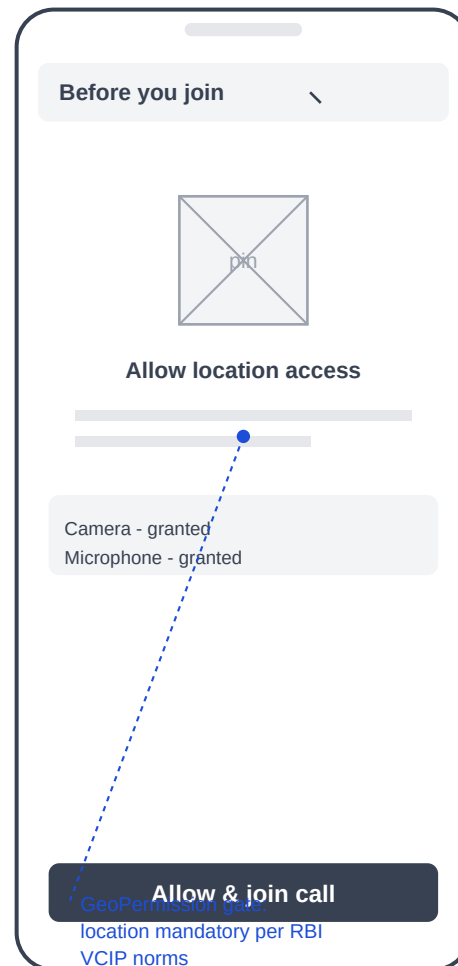

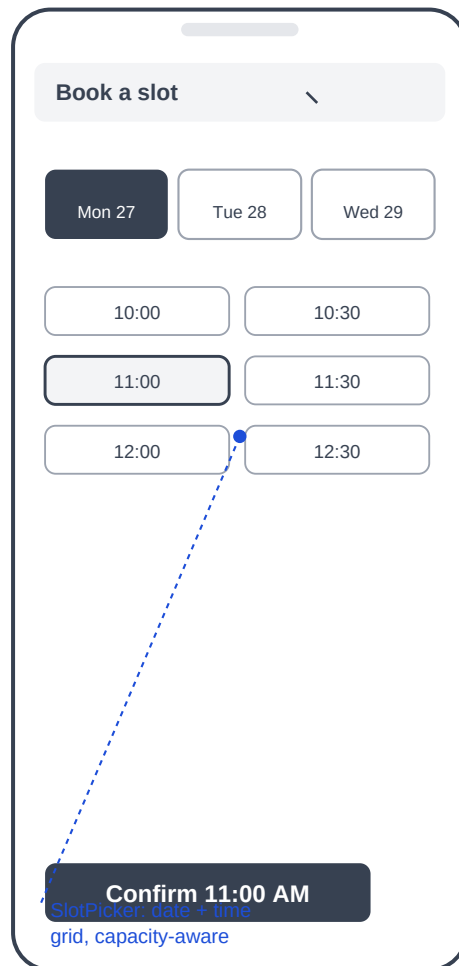

COMPONENTS

SlotPicker

GeoPermission

WebRTC VideoRoom

OfficerPromptPanel (ops)

WebRTC VideoRoom; officer prompts appear as subtitles

OfficerPromptPanel (ops)

- ☒ Greet + verify name
- ☒ Ask DOB
- ☐ Show PAN to camera
- ☐ Random Q from script
- ☐ Capture face match

Next prompt

Note: GeoPermission must be granted before joining (regulatory geo-tag). OfficerPromptPanel is rendered only on the ops side of the same room.

Claim next: auto-assigns highest-priority unclaimed case

Checks

☒ Name matches across PAN / Aadhaar

☒ DOB consistent

☐ Address OCR confidence low - value: 0.81

Reason code (required)

☐ R01 - Photo mismatch

☐ R04 - Doc unreadable

☒ R07 - Address mismatch

☐ R12 - Suspected tamper

Approve

Reject

Refer / Escalate

Notes:

Ctrl+Enter to submit

Split-pane doc viewer (resizable)

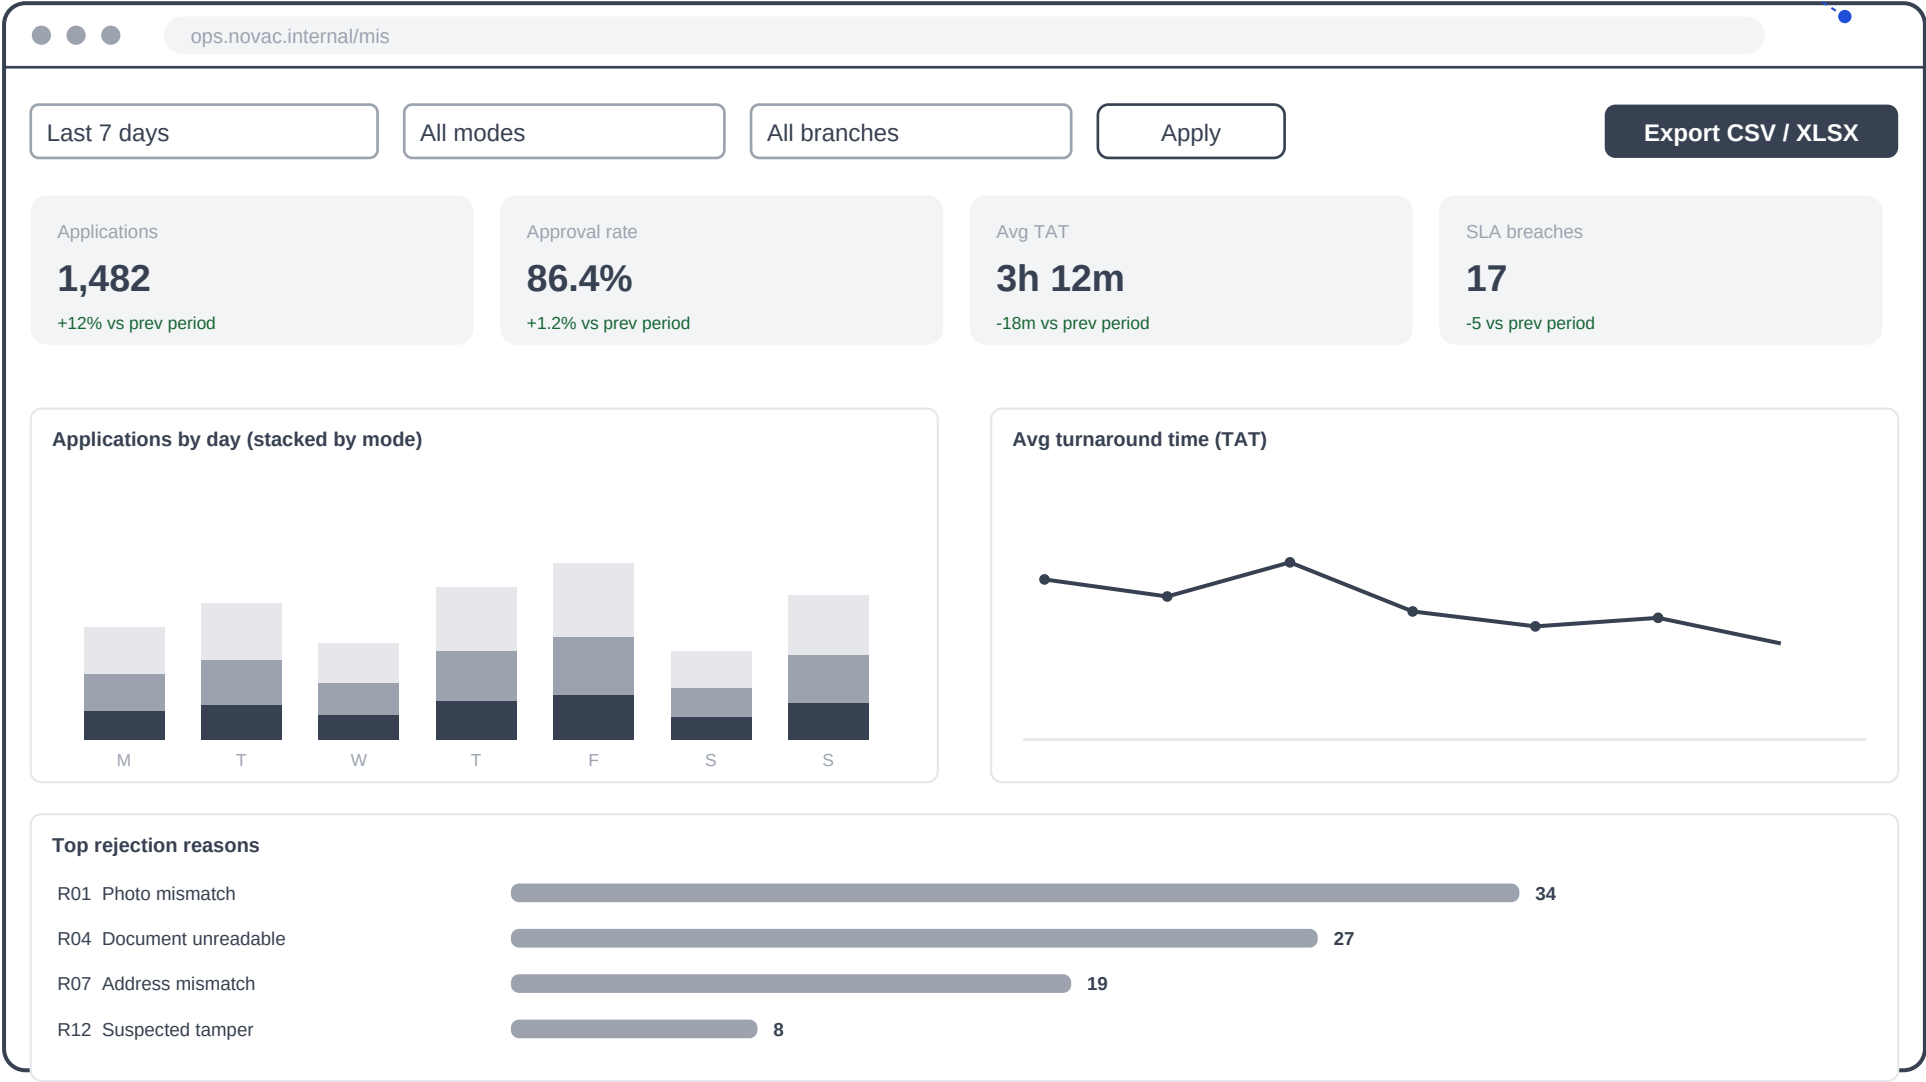

ReasonCodePicker opens on Reject / Refer

Note: Split pane: doc viewer left, extracted fields + match scores right. DecisionBar is sticky; Reject/Refer require a reason code.

COMPONENTS

- Dashboards
- exports

Exports: CSV/XLSX of filtered dataset

Note: Filter bar drives all tiles; Export produces CSV/XLSX of the underlying dataset for the selected range.
